

What I heard you say is...

I disagree with the results
because...

I agree with the results
because....

What is another way we
could check our results?

I don't understand ...

Can you tell me why you
think that?

Could you explain that to
me another way?

I have a question about ...

This is a bit like...

SIMILARITIES

What Science idea can we explain here?

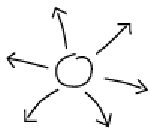

How did that happen?

What connection can you make with what you already know?

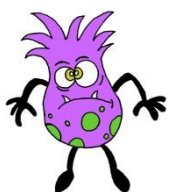

What's another thing we could try?

How do you know that answer is correct?

I'm still a little fuzzy

about ...

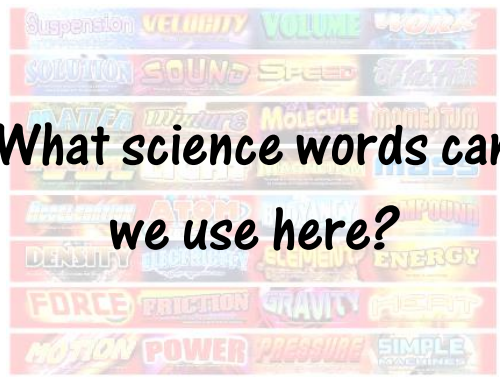

I got different results because.....

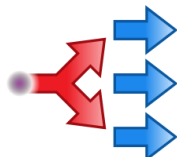

I noticed that...

What science words can we use here?

I did it this way ...

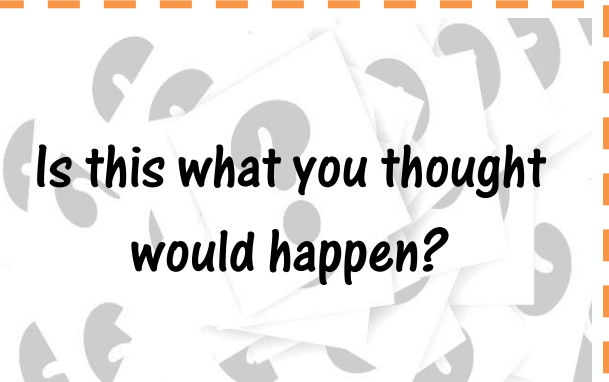

How are we being scientists?

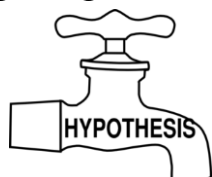

What other data could we collect to test our idea?

Is this what you thought would happen?

What's going to happen?

What other evidence do we have about that idea?
